

James Lick High School A New Tech School

Dear Families,

It is both an honor and a privilege to personally welcome back our returning students and to open our doors and arms to the class of 2021. This is a special moment for me, as I have taken over the position of Principal at James Lick High School. Since 1999, I have served as a proud Comet in many different roles and from day 1 it has felt like home. Our staff has an unwavering belief that every student who walks through our doors is going to graduate and make an impact in our community. Our students continue to define the fortitude and persistence required to achieve their academic and personal goals. Above all, the staff and students of James Lick High School have created a culture of love and acceptance that makes me proud to call myself a comet.

The 2017-2018 year is special because it marks the final year of implementation of Project Based Learning and our affiliation with the nationally recognized - New Tech Network. Being a member of the New Tech Network means that our instructors see beyond the content of their curriculum in order to teach the critical skills of Agency, Communication and Growth Mindset.

Our core values and mission will remain singularly focused on preparing students for college and career in every classroom, every day. In order for our students to attain their goals and ambitions, we know that they will face challenges and set-backs. Our job is to prepare students to see these hurdles as opportunities and to take them on with the confidence that only comes with having faced rigorous and authentic courses. A James Lick High School Student does not stand alone, they have a family of peers that will support them and they can count on every staff member to be right next to them to encourage them when they make mistakes and celebrate them when they succeed (and every student will succeed).

The doors of James Lick High School and my office will always be open to you, James Lick is your community and I hope you will be able to stop by and say hello.

Sincerely, David Porter
